Blake Sterling

Junior Site Reliability Engineer · Observability & Cloud Costs

Boise, ID · blake.sterling@example.com · github.com/blake-sterling-example

SUMMARY

Junior SRE in my first year after a career change from IT support. I'm learning observability by moving our services to OpenTelemetry, and I help my team understand and reduce our cloud bill. At this conference I'm looking for beginner-friendly talks, a mentor in the SRE community, and my next role.

EXPERIENCE

Junior Site Reliability Engineer — Pinecrest Health Tech 2025 – Present

- Moving 30 services to OpenTelemetry tracing and logging with sampling to control costs.
- Built showback dashboards so each team sees what its services cost each month.
- Join the on-call rotation and write post-incident notes.

IT Support Specialist — Granite Valley School District 2020 – 2025

- Automated laptop setup with scripts, saving hours each week.
- Supported 2,000 staff and students across 14 schools.

SKILLS

Observability: OpenTelemetry, Prometheus, Grafana, logging · **Cloud:** cost reports, right-sizing, Kubernetes basics · **Languages:** Python, Bash

OPEN SOURCE & COMMUNITY

- Completed a cloud native fundamentals course and two Kubernetes workshops.
- Volunteers at a local tech meetup for career changers.

EDUCATION

Associate Degree, Information Technology — Snake River College 2020
